

## **Info on the Pandemia**

### **Re. your booking:**

We do monitor the actual situation very seriously. Should there be any new travel or other restrictions, we will contact all guests as soon as possible, before the due date of the final payment (30 days prior to departure) latest.

We will then suggest the best possible alternative acc. to the actual situation – either a new routing of the vessel, a re-booking of any other available cruise, a credit for the down payment or a re-charge of the down payment.

With the travel documents sent app. two weeks prior to departure you will also receive the actual version of our hygiene concept (as well as information on possible actual online registrations that may be necessary for the entry to the individual country. Currently most of the travel restrictions have been canceled. Please inform yourself as well via the website of the Foreign Offices and your airline.)

Please note, that for the time being on our vessels a full vaccination or a proof of recovery from COVID is requested for guests and crew.

Actually we exposed the antigen self-test that was mandatory so far prior to embarkation. Instead of this the crew will now use a fever measurement on the forehead.

### **Re. your insurances:**

We strongly recommend policies for travel cancellation, trip cancellation and a COVID supplement. They can be finished with any specialized company or may be already included in your credit card contract.
